

## Humboldt Day 2020

### 14 September

18.00 Ferenc Jordán: Welcome (in Hungarian)

18:10 János Podani: Az élet korallja (in Hungarian)

### 15 September

10:00 Ferenc Jordán: Welcome

10:05 Martin Kainz: Unravelling the secrets of aquatic food webs - from essential nutrients to potential contaminants

10:20 Barbara Barta: Limnology of shallow, high altitude lakes in the Ecuadorian Andes

10:35 Margaux Mathieu-Resuge: The ecological role of 'flying' omega-3 from water to land

10:50 Anett Endrédi: Who is where in marine food webs? A trait-based analysis of network positions

11:05 Matthias Pilecky: How dietary lipids affect behaviour and cognition - A Multiperspective synthesis

11:20 Bálint Preiszner: Fish carcass decomposition by macroscopic scavengers: Laboratory experiments with freshwater fish and crayfish.

11:35 Lena Fehlinger: The 3rd fresh project EUROPONDS - Young researchers investigating ponds across Europe

11:50 Libor Zavorka: The effect of dietary fatty acids on brain development and cognition of fish

12:05 Discussion, closing „ceremony”.

ZOOM invitations will be sent out for both days on 14 September morning.
